

Casey's Announces First Quarter Results

September 7, 2022

ANKENY, Iowa--(BUSINESS WIRE)-- Casey's General Stores, Inc. ("Casey's" or the "Company") (Nasdaq: CASY) a leading convenience store chain in the United States, today announced financial results for the three months ended July 31, 2022.

First Quarter Key Highlights

- Diluted EPS of \$4.09, up 28% from the same period a year ago.
- Inside same-store sales increased 6.3% compared to prior year with a margin of 39.8%. Total inside gross profit increased 8.8% to \$504.3 million compared to the prior year.
- Fuel gallons decreased 2.3% on a same-store basis compared to prior year with a fuel margin of 44.7 cents per gallon. Total fuel gross profit increased 31.4% to \$308.2 million compared to the prior year.
- Same-store operating expense excluding credit card fees were up 2.6%, favorably impacted by a 2% reduction in same-store labor hours.

"Casey's delivered another strong quarter to its shareholders due to strong inside sales and robust fuel margin," said Darren Rebelez, President and CEO. "Inside same-store sales were driven by prepared food and dispensed beverages, most notably pizza slices, our refreshed breakfast menu, as well as cold dispensed beverages. Alcoholic beverage sales remain strong as our team continues to leverage our approximately 1,500 liquor licenses throughout our store base. The fuel margin environment was especially favorable in the second half of the quarter as wholesale costs declined from record highs. Our differentiated business model enables us to perform well in a variety of economic conditions, and we are confident in our ability to execute on our long-term strategic plan."

Earnings

	Three Months Ended July 31,	
	2022	2021
Net income (in thousands)	\$ 152,932	\$ 119,159
Diluted earnings per share	\$ 4.09	\$ 3.19
Adjusted EBITDA (in thousands)	\$ 293,209	\$ 243,189

Net income, diluted EPS, and Adjusted EBITDA (reconciled later in the document), were up compared to the same period a year ago as higher profitability both inside the store and in fuel was partially offset by higher operating expenses due to operating 74 additional stores as well as increased credit card fees resulting from the record high retail price of fuel.

Inside

	Three Months Ended July 31,	
	2022	2021
Inside sales (in thousands)	\$ 1,266,617	\$ 1,143,925

Inside margin	39.8%	40.5%
Grocery and general merchandise margin	33.9%	33.0%
Prepared food and dispensed beverage margin	55.6%	61.0%

Total inside sales were up 10.7% for the quarter driven by strong performance in prepared food items including pizza slices, hot breakfast sandwiches and burritos, as well as non-alcoholic and alcoholic beverages, salty snacks and candy from the grocery and general merchandise category. Inside margin was down 70 basis points compared to the same quarter a year ago. Grocery and general merchandise margin was positively impacted by joint business planning with our vendor partners and strategic retail price adjustments, offset by higher prepared food and dispensed beverage ingredient costs, notably cheese.

Fuel margin (cents per gallon, excluding credit card fees)	44.7¢	35.1¢

Total gallons increased 3.3% compared to the prior year due to the store count increase while same-store gallons sold were down 2.3% versus the prior year, as volumes were impacted by high retail fuel prices. The Company's total fuel gross profit was up 31.4% versus the prior first quarter given the favorable environment due to falling wholesale costs. The Company sold \$17.7 million in renewable fuel credits (RINs) in the first quarter, a decrease of \$1.0 million from the same quarter in the prior year.

¹ Fuel category does not include wholesale fuel activity, which is included in Other.

RECONCILIATION OF NET INCOME TO EBITDA AND ADJUSTED EBITDA

We define EBITDA as net income before net interest expense, income taxes, depreciation and amortization. Adjusted EBITDA further adjusts EBITDA by excluding the gain or loss on disposal of assets as well as impairment charges. Neither EBITDA nor Adjusted EBITDA are considered GAAP measures, and should not be considered as a substitute for net income, cash flows from operating activities or other income or cash flow statement data. These measures have limitations as analytical tools, and should not be considered in isolation or as substitutes for analysis of our results as reported under GAAP. We strongly encourage investors to review our financial statements and publicly filed reports in their entirety and not to rely on any single financial measure.

We believe EBITDA and Adjusted EBITDA are useful to investors in evaluating our operating performance because securities analysts and other interested parties use such calculations as a measure of financial performance and debt service capabilities, and they are regularly used by the Company for internal purposes including our capital budgeting process, evaluating acquisition targets, assessing performance, and awarding incentive compensation.

Because non-GAAP financial measures are not standardized, EBITDA and Adjusted EBITDA, as defined by us, may not be comparable to similarly titled measures reported by other companies. It therefore may not be possible to compare our use of these non-GAAP financial measures with those used by other companies.

The following table contains a reconciliation of net income to EBITDA and Adjusted EBITDA for the three months ended July 31, 2022 and 2021:

(in thousands)	Three Months Ended July 31,	
	2022	2021

Loss (gain) on disposal of assets and impairment charges	230	(1,770)
Adjusted EBITDA	\$ 293,209	\$ 243,189

NOTES:

- Gross Profit is defined as revenue less cost of goods sold (exclusive of depreciation and amortization)
- Inside is defined as the combination of Grocery and General Merchandise and Prepared Food and Dispensed Beverage
